

The St Andrews Centre for Exoplanet Science and School of Earth and Environmental Sciences invites you to a public lecture by:

Dr. Steve Vance (NASA JPL)

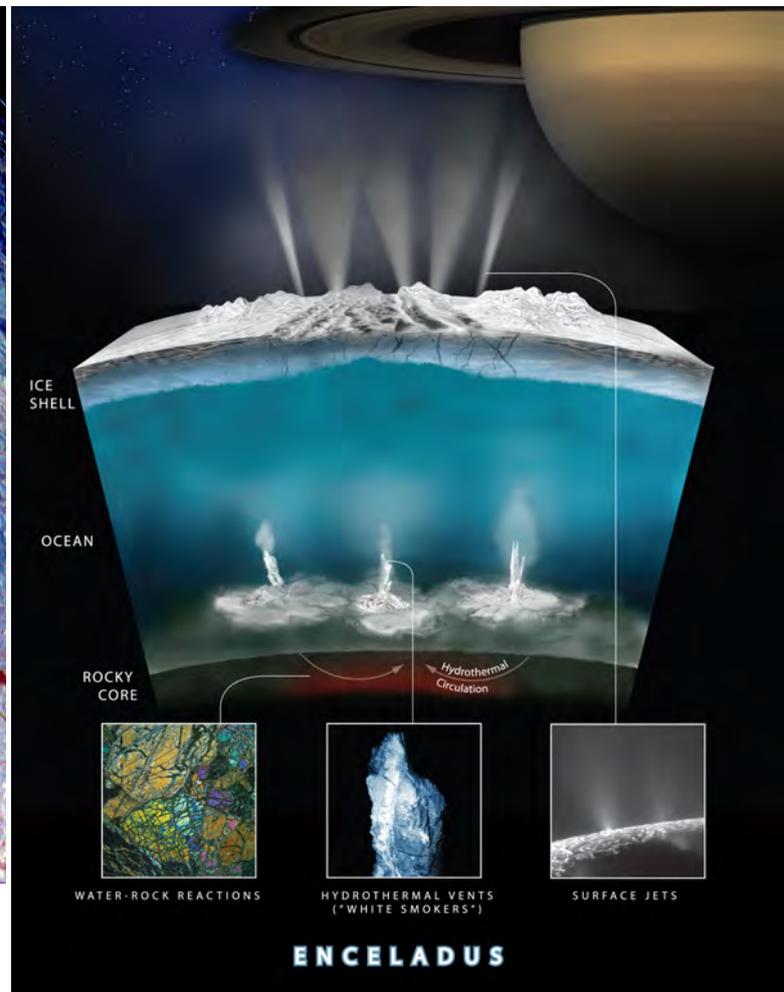

November 23rd, 2018 6:00 pm

School 3, St Salvator's Quad

Exploring Icy Ocean Worlds in the Solar System and Beyond

Above: NASA Galileo image of the surface of Jupiter's moon Europa

Right: NASA cartoon of processes occurring on Saturn's moon Enceladus

A big thanks to
our sponsors!

Steve Vance is an astrobiologist and planetary scientist at NASA's Jet Propulsion Laboratory, and is a Project Scientist for the upcoming Europa Clipper mission. He will talk about his research into oceans on the moons of Jupiter, Saturn, and beyond, describing plans by NASA and other space agencies to explore these mysterious worlds and look for signs of life.
